HireHub | Updated ER Diagram in Chen Notation

Student + recruiter + admin modules | 12 entities, 114 stored attributes, 16 FK relationships

Rectangles: entities | Ovals: attributes | Diamonds: relationships | Underline: primary key | (min,max): participation

Source: current models.py and implemented API routes in the supplied internship portal ZIP. All existing entities and attributes retained.

Chen notation includes FK and SQL type annotations for implementation traceability. Detailed constraints and schema drift are in the PDF appendix.

The model was inspected statically; no live database dump was supplied. Updated 16 October 2026.
